

Application Brief: Automation Products & Applications for Support of Nasal Spray Product Testing

InnovaSystems offers a family of products to support testing of Nasal Spray Products. These products automate many of the applications recommended in the FDA Guidance's. This family of products allows a User to realize the benefits of automation with a simple, stand-alone MightyRunt Actuator and add capabilities with integrated solutions. The following table summarizes the applications and lists the products capable of supporting the respective applications.

APPLICATIONS

P R O D U C T S	Actuations	Dose Weights	Actuation/Dose Weights >20 bottles, Unattended	Tail-Off, Priming, Repriming	Content Uniformity, Collection	Droplet Size
	MightyRunt	●	1			2
	NSP VA	●	1			2
	PAWS	●	●		●	2
	NSP DW	●	●	●	●	
	NSP DWC	●	●	●	●	●
	Spraytec					

- – Application performed on these products
- 1 – Automated actuation, manual weigh
- 2 – Automated actuation, manual collection
- 3 - InnovaSystems MightyRunt Actuator integrated with the Malvern Spraytec
